SUBPROJECT DESCRIPTIONS

NPRC MANAGEMENT SUBPROJECTS

INFORMATION TECHNOLOGY SERVICES (0542)

NPRC UNIT: ADMINISTRATIVE

%NPRC \$: 0.000%

INVESTIGATOR	DEGREES	STAFF	DEPARTMENT	NON-HOST INSTITUTION: STATE, COUNTRY
withheld				

SUBPROJECT DESCRIPTION

The mission of the Information Technology Unit is to provide technology support for the faculty and staff of the Tulane National Primate Research Center, including maintaining an animal records system database, assisting with desktop and network computing, and assisting with multimedia presentation development and production. IT provides support for a complete clinical animal records system, which provides clinical veterinarians, clinical lab technicians, pathologists and research scientists the ability to enter and retrieve data on the research animals. Besides the necessary maintenance and reporting, the primary issue facing the IT unit database staff was a migration from the PI/open DBMS to MS SQL Server. This project was begun in late December of 2002, but was put on hold because of increased demands on the database staff. We expect its completion by mid-2006. Desktop Support staff provides support for Windows-based and Macintosh computers, laser printers and other devices comprising a nearly 300 node 100BaseT Ethernet network. The campus has six main network servers. Solaris-based server provide e-mail access and access to the animal records system, while Windows 2003 servers act as file servers for both Macintosh and Windows-based desktop clients. Internet access is provided through a DS 3 circuit interconnecting the TNPRC to the Tulane University uptown campus. Desktop support personnel custom-build and repair Windows-based PCs. They advise staff on the purchase of computer hardware and software. They also install site licensed and public domain software for all computers and assist users in maintenance and system upgrades. Desktop support calls numbered over 1,200 currently. The Media Lab staff provides multimedia production support by assisting with the following: slide presentation production, 35mm slide creation, 35mm slide scanning, document and image scanning, color document and image creation, video production (including filming and editing), and research poster creation. This lab receives dozens of requests each week for service. The Media Lab continues to grow, with new digitizing equipment, improved 35mm slide production, better color print processing and better video presentation equipment. During the year video conferenced presentations are regularly scheduled and coordinated.

ADMINISTRATIVE SERVICES/BUSINESS OFFICE (0583)

SUBPROJECT DESCRIPTION

Because the Center is located **Person** from the University, the Center Division of Administrative Services is the central point of contact for Center faculty and staff for virtually all financial and administrative functions. All transactions submitted by the Primate Center are reviewed and approved by the Business Office to assure compliance with both Federal and University regulations and policies. Pre and post grant and contract award functions processed by Grants Administration include budget preparation and application submission, award administration, account reconciliation and all required financial reporting. Both annual and five-year base grant budgets are prepared as well. Cost recovery rates are set and administered for all research studies, both internal and outside collaborative. Billable outside collaborative projects are invoiced and their payments processed by the Business Office. Administrative Services staff work closely with IT staff in developing and maintaining databases and applications for the tracking of animal assignments and acquisitions, project cost recovery and various administrative records. All aspects of Human Resources are handled by the Division of Administrative Services, including hiring and termination of employees, initiation and distribution of payroll, on the job injury reporting, employee counseling, etc. General support services are provided, including reception, switchboard, maintenance of telephone and radio systems, postage and shipping and Center wide central filing.

FACILITIES AND OPERATIONS (0584)

NPRC UNIT: ADMINISTRATIVE

%NPRC s: 0.000%

INVESTIGATOR	DEGREES	STAFF	DEPARTMENT	NON-HOST INSTITUTION: STATE, COUNTRY
withheld				

SUBPROJECT DESCRIPTION

Facilities and operations services are managed by Facilities Services which is responsible for maintenance, building construction and renovations, HVAC systems and controls, groundskeeping, incinerator operation, sewerage treatment plant operation, and day-to-day operations in the power plant and boiler room. The unit is also responsible for compliance with relevant local, state and federal regulations that govern the Center's facilities operations.

Facilities Services maintains eight main buildings (approximately 110,000 ft²) and 69 primate corrals located on the Center's 500 acres. In addition to the eight main buildings, the Center has numerous other buildings such as generator sheds and storage buildings that support the Center's operations.
