

K11027

Treatment and/or observation			** Function:01800** ** Function:00160** ** Topography:50100 Function:62350 Comments:DK: Animal has had this problem since birth with most bowel movements occurring only during or right after rectal temp. taken. Stools are sometimes small and firm instead of the soft consistency that is normal for an infant on formula. Dr. Juul notified and advice requested.** ****
Released, nos	04/Mar/11		** Comments:3/4/11 DK: Is passing normal stools and doing well. Close case.** ****
Consultation	31/Jan/11		Case reviewed with IPRL staff, KV and Dr. Juul. ** Function:01800** ** Function:00155** ** Function:01704 Comments:DK: Animal weighed 435gm at birth on 1/31/11 and 375gm on 2/6/11. Ribs easily seen through skin and all bones easily palpated. Due to lack of SC fat stores, it's not possible to get an accurate assessment of hydration status via skin turgor but mucous membranes are moist. Has been on 50% Enfamil formula but will now be put on 100%. ** ** Comments:Case reviewed with IPRL staff, KV and Dr. Juul.**
Treatment and/or observation			****
Physical examination	07/Feb/11		2/7/11 @ 2:00 p.m.: DK: Infant already looking better. Is more alert and abdomen is filled out. ** Comments:2/7/11 @ 2:00 p.m.: DK: Infant already looking better. Is more alert and abdomen is filled out.**
Released, nos	09/Feb/11		** Comments:2/9/11 DK: Is starting to gain weight - 380gm today and intakes are good. ** ** Comments:2/11/11 DK: Infant's condition has stabilized. Intakes are good, is gaining wt. daily and is thermo-regulating well enough to be moved out of isolette today. Plan: Continue monitoring over weekend. If wt. gains continue - close case on 2/14/11. ** ** Comments:2/14/11 DK: Wt. on 2/13/11 - 390gm. Is continuing to gain wt. at a normal rate and doing well. Close case ** ****
Administration of medication topically			** Function:01800** ** Function:00160** ** Topography:Y9720** ** Topography:11967 Morphology:10000 Comments:DK: What looks to be burn trauma of the D5 of left foot. ** ****
Treatment and/or observation			****
Silver sulfadiazine (Silvadene)	05/Feb/11	08/Feb/11	topic Topical BID AM( )PM( )
Triple antibiotic (BNP)	04/Feb/11	04/Feb/11	topic Topical SID PM( )
Physical examination	07/Feb/11		2/7/11 DK: Wound on D5 is resolving and involves ~25% of the area it did on 2/4/11. ** Comments:2/7/11 DK: Wound on D5 is resolving and involves ~25% of the area it did on 2/4/11.**
Treatment response, good	09/Feb/11		** Comments:2/9/11 DK: Wound has healed and resolved and there is no further need for clinical tx. Close case. ** ****
